

LGT8F48D/88D/168D/328D

More than Compatibility

More fast instruction efficiency

More accuracy internal frequency

More accuracy voltage reference

More fast timer and PWM

More security PWM timing

More accuracy 12bit ADC

More useful Analog comparator

More useful analog frontend

More easy power control

More packages

More cost friendly!!

FEATURES

More family members

LGT8F48D: 4KB FLASH, 512B SRAM, 1KB Data FLASH
LGT8F88D: 8KB FLASH, 1KB SRAM, 2KB Data FLASH
LGT8F168D: 16KB FLASH, 1KB SRAM, 4KB Data FLASH
LGT8F328D: 32KB FLASH, 2KB SRAM, Shared Data FLASH

More Fast Timers

Two 8bit Timer/Counter with independent prescaler
One 16bit Timer/Counter with independent prescaler
64MHz internal frequency for fast and high resolution PWM
Up to 6 channels PWM with **dead band** support

More accuracy analog modules

8-channel 12bit Analog to Digital Converter (ADC)
Internal independent power monitor channel (VCC/4)
Internal High resolution **1.25V/2.56V** $\pm 1\%$ voltage reference
2x Analog comparator with 2x 8bit DAC for internal reference
2x Fixed-gain, dual direction OPA frontend for ADC/AC
2-channel 8bit DAC output

More other improvements

High resolution internal **16MHz** $\pm 1\%$ RC oscillator
Low power 32KHz RC oscillator
Low power POR and 3-level Low voltage detector
More efficiency active and sleep power control

Digital Peripherals

SWD Two-wire On Chip Debug & Programming Interface
Programmable Watch dog timer
Async/Sync Universal Receiver/Transmitter (USART)
Master/Slave SPI Interface
Master/Slave Two-wire Interface (TWI), compatible with I2C

More Robust Working Environment

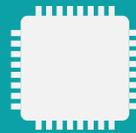

0~20MHz @ 1.8V ~ 5.5V
-40C ~ +85C
4000V HBM ESD

More packages

All series support following packages:
QFP32L/SSOP28L/SSOP24L/SSOP20L

LGT8F48D
LGT8F88D
LGT8F168D
LGT8F328D

Flash Based 8bit RISC Microcontroller

APPLICATIONS

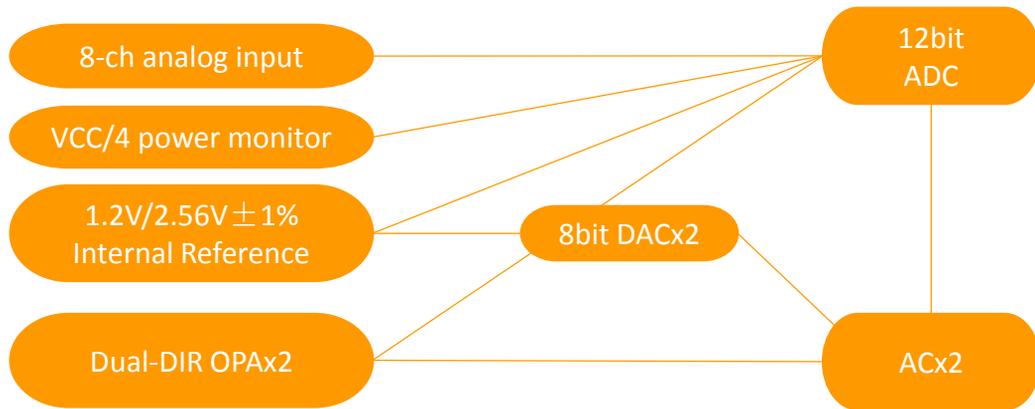

Home Appliance

Induction Cooker
Microwave Oven
Electronic Rice Cooker
Soybean milk machine
Coffee Maker
Water Heater

Smart Consumer Electronics

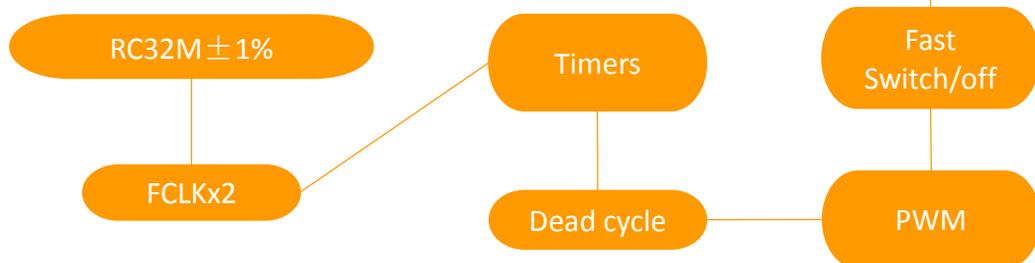

Battery Management
Intelligent Appliance
Smart Sensor Node
Electronic Toys

More useful analog modules

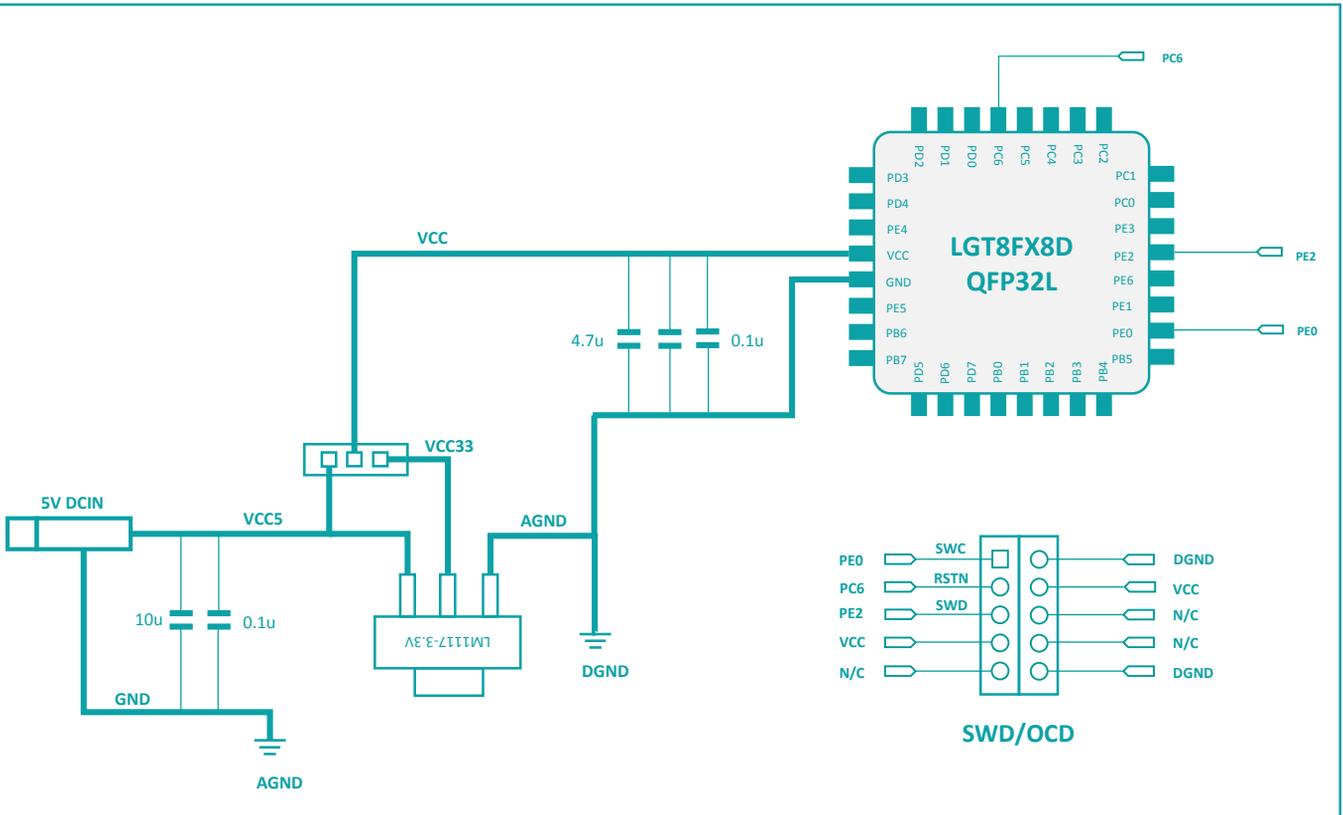

- Internal voltage reference for ADC and source of DAC
- 8bit DAC output to one channel of Analog comparator
- Each OPA support up to 2 external input channel
- OPA support x12 gain in normal mode and x11 in input-inverting mode
- OPA output can be sampled by ADC
- Analog comparator support flexible filter backend
- Comparator output can be used to disable PWM output automatically
- AC combined with OPA can be used to implement flexible over-current and over-voltage circuits

More fast timer and PWM

- Internal frequency double generate 64MHz clock for fast timer application
- Up to 500KHz@7bit high resolution PWM
- Dead cycle inserted to protect external MOSFET driver
- PWM can be disabled automatically by analog comparator or other sources
- Up to 6 channel PWM output
- Up to 4 channel support fast PWM and dead cycle insertion

Minimal Reference

LGT8FX8D Series reference circuit	
Author	LogicGreen TEK
Date	2015/03/15
Version	V1.0.0

ARDUINO SUPPORT

LGT8FX8D series is fully Arduino compatible. LGT8F328D support up to 32KB programmable memory and 2KB SRAM which make kinds of arduino application possible.

With the help of Arduino platform, you can work With all the creators around the world to show your bright ideas and products.
