Bug Report Siglent SDG2000x

Date: 28 March 2021

Bug related to Labview driver SDGXSeries_LabView_Driver_1.0.2.zip

With latest Labview community edition 2020

Description

Using the latest published firmware 2.01.01.35R3B2

Gives an error.

See figure1 below.

Partly Resolved

by using firmware 2.01.01.35R3B3 from a zipfile kindly provided by Rob Annandale tautech.nz@gmail.com

One of the examples from the 1.0.2 zipdriver is not working.

The sweep example has a problem. It has been resolved by removing the three ',' as shown in figure2.

To do:

1) Make available newest firmware version with an updated firmware revision history pdf with all the changes made.
2) Make available a new Labview driver/examples file with a updated readme.
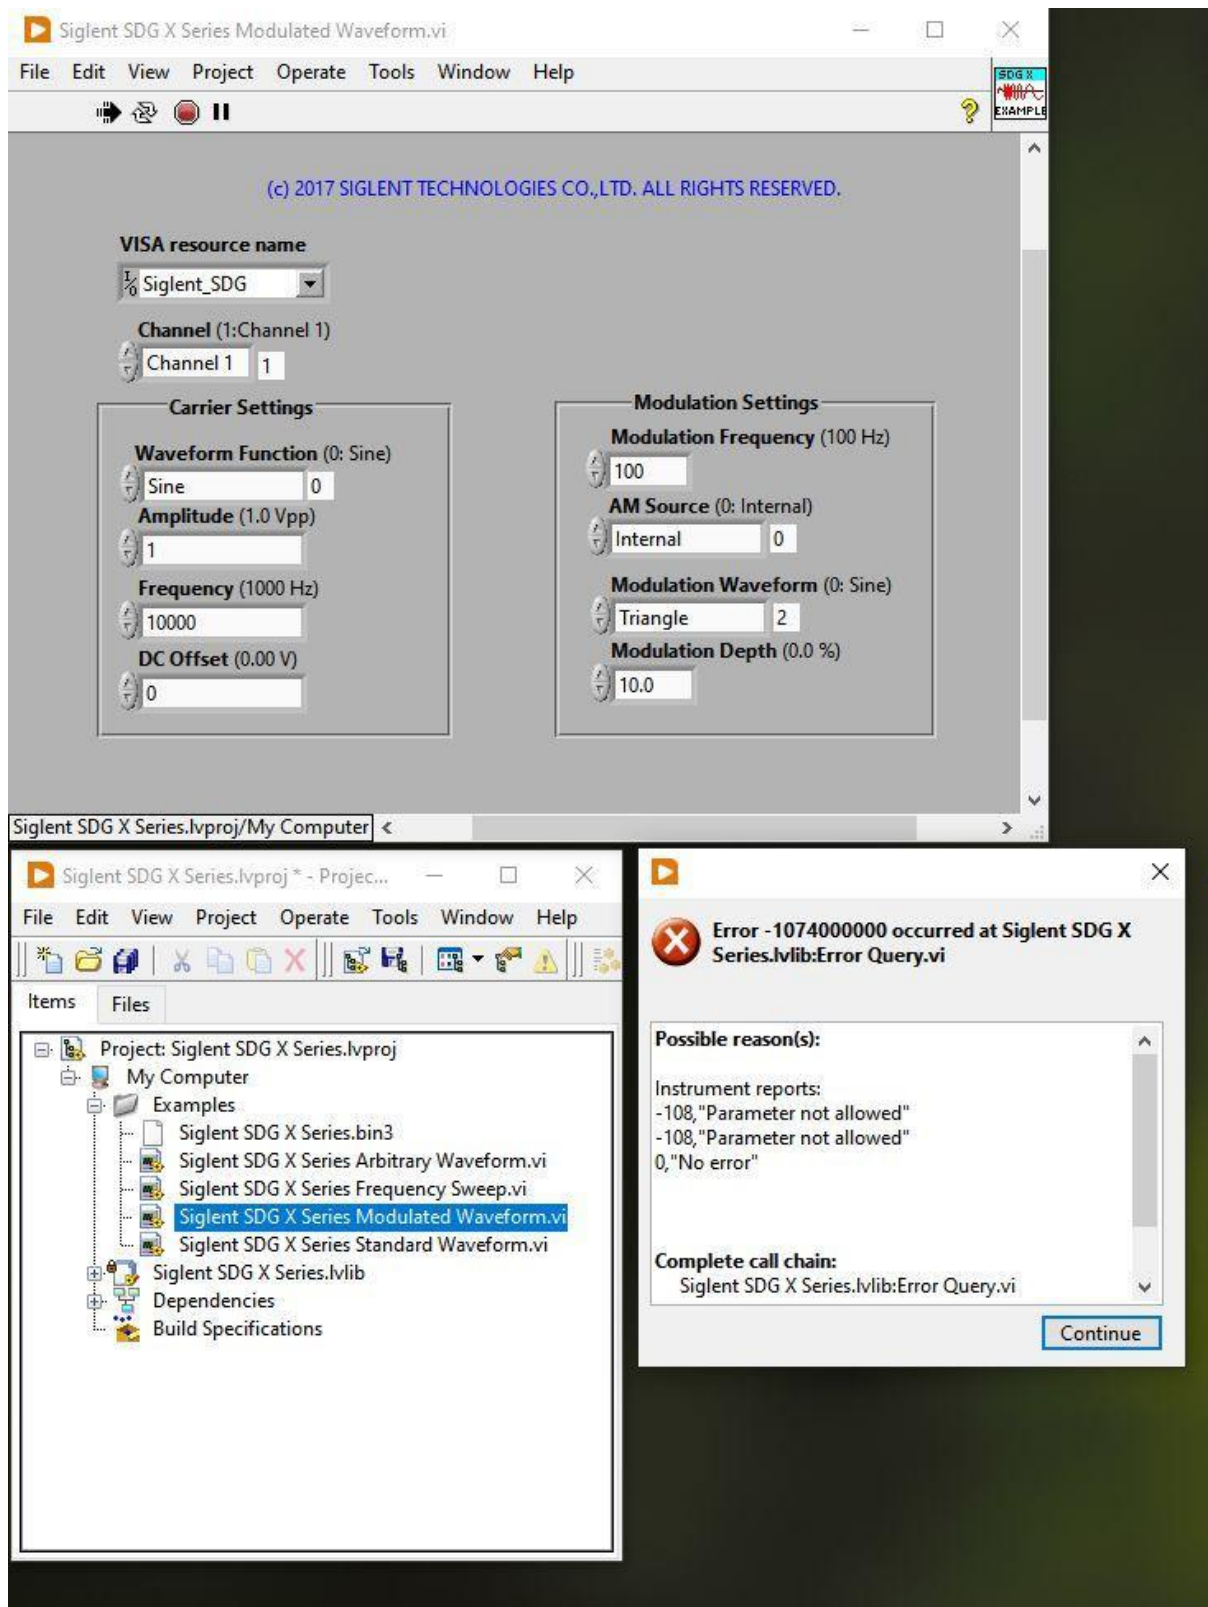

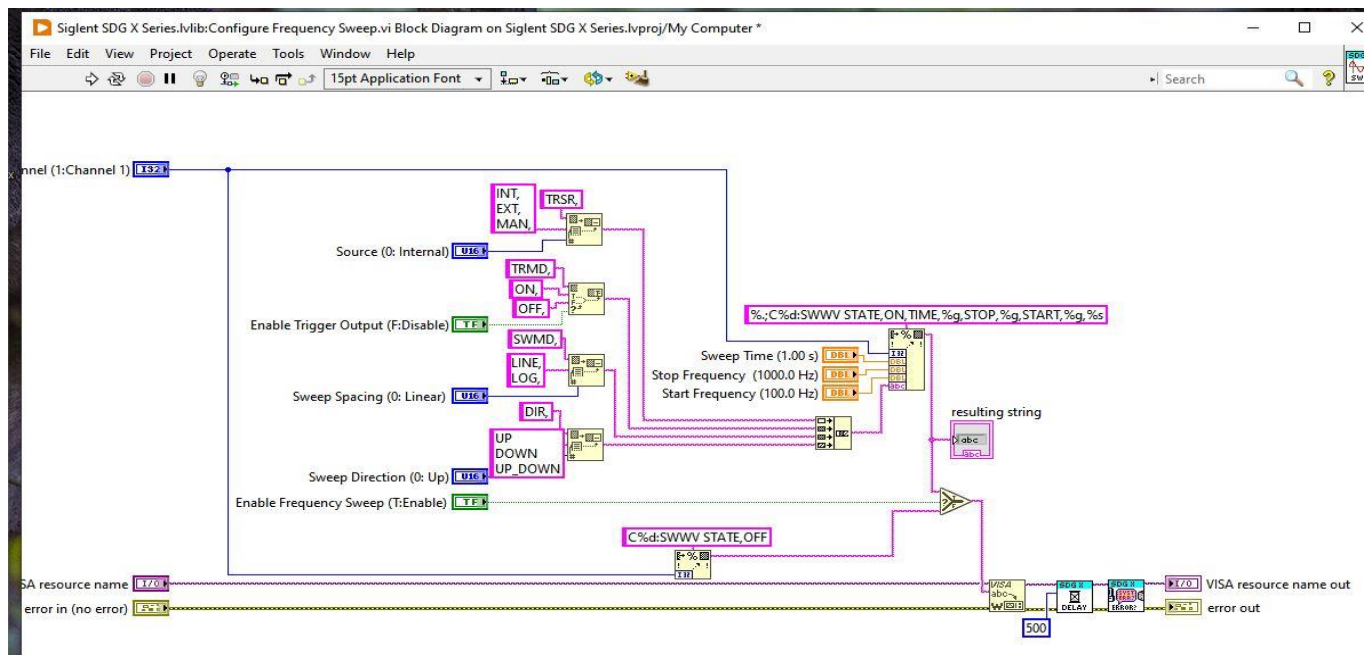

Fig 1.

Figure 2. Removing the comma's after UP DOWN UP_DOWN resolved the problems.
